1.Epic:
● An agile epic is a body of work that can be broken down into specific tasks(called user stories) based on the needs/requests of customers or end-users
● Epic is large requirements
● An epic is a large story that cannot be simply achieved in a single sprint.Usually, it takes months to accomplish an epic.

2.User Story:
● A user story is an informal,general explanation of a software feature written from the perspective of the end user.
● User stories further divided into tasks

3.Tasks:
● Tasks are the smallest unit used in scrum to track work.
● Tasks need to be completed by the individual person
● Complex task or bug tasks are further divided into the sub-task.

4.Sub-Task:
● Subtasks are your smallest pieces of work to be tracked and are a tool for those committing to the parent Task or Story to break their work down further and track how they want to do it.
● A task that is part of a more complex task

Spike In Agile Scrum
● Spike is a Time-boxed user story created for investigation, who's outcome gives possible solutions and estimation for actual User Story

Spillover:

- If any works is still pending by end of the sprint, we can call this as spillover.
